Proposal Prototypes, Restyled

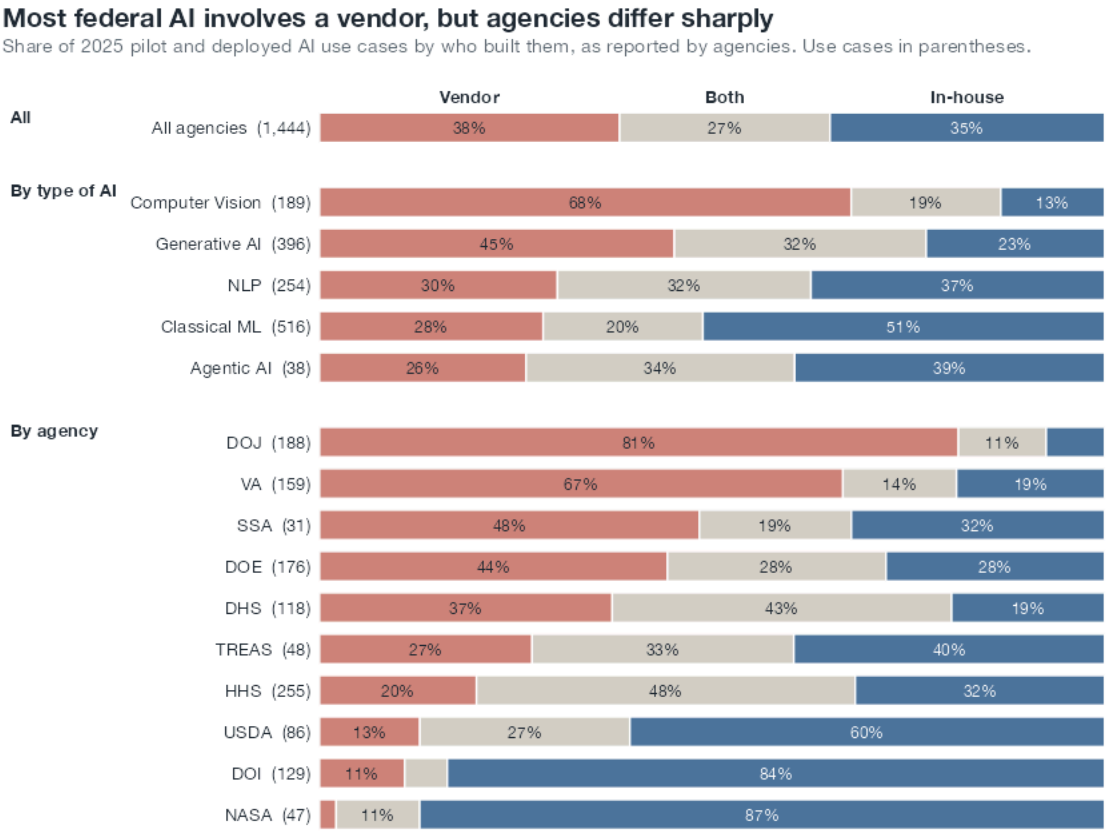

Design Brief · PPOL 5202 · Who Builds Federal AI?

Guo (Nora) Zhan

2026-10-19

The three prototypes from my proposal, rebuilt in R with my project theme. They read the same chart tables as the Tableau workbook (`proposal/tableau_data/`, written by `code/03_build_tableau_data.Rmd`), so the numbers are unchanged. The originals stay in `proposal/figures/`.

1. Make or buy

Agencies with fewer than 30 pilot or deployed use cases that report a development approach are excluded.
Source: OMB 2025 Federal Agency AI Use Case Inventory, github.com/ombegov.

2. Agency AI portfolios by topic area

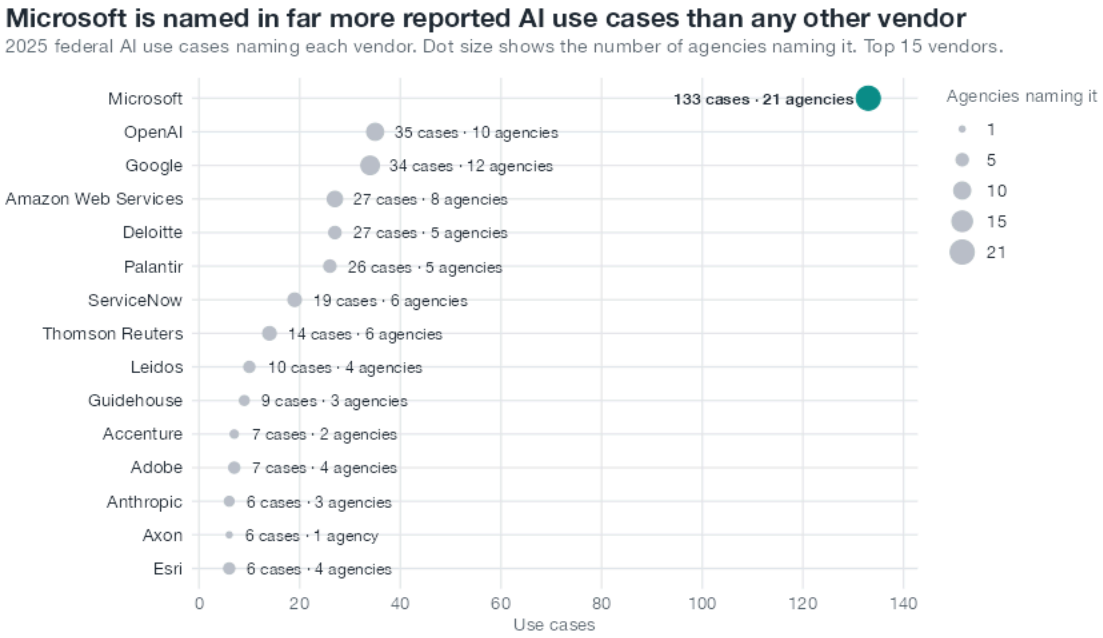

Agencies concentrate their AI in one or two kinds of work

2025 AI use cases by agency and topic area, as reported. Darker cells hold a larger share of the agency's use cases. Total use cases in parentheses.

	Science	Admin	IT	Health & Med	Law Enforce	Energy & Env	Service Delivery	Transit	Procure	Other
NASA (424)	387	6	6	3	1	0	5	9	2	5
HHS (398)	48	117	87	89	4	0	18	0	7	28
DOE (325)	84	45	90	1	0	40	0	2	8	55
VA (295)	2	25	18	166	5	0	12	0	12	55
DOJ (295)	1	62	34	7	170	1	5	1	6	8
DOI (234)	170	10	2	0	1	25	7	1	2	16
DHS (205)	0	53	11	3	86	0	12	16	3	21
USDA (143)	60	7	17	1	0	14	16	2	3	23
TREAS (118)	4	22	56	0	0	0	18	0	14	4
DOT (70)	0	22	0	0	0	0	0	48	0	0
TVA (59)	0	4	11	0	0	41	0	0	0	3

Agencies with at least 50 use cases that report a topic area. The ten most common topics are shown; the rest are grouped as "Other."

3. Vendors named in 2025 use cases

Vendor names are free text, split on separators and matched to firms (e.g., Copilot and Azure count as Microsoft). A firm counts once per use case.
